turnium

Cloud Connectivity

Multi-carrier bonded access and failover for enterprise cloud applications.

New Services, New Revenue, Customer Satisfaction

When your customer's connection to the cloud fails, you get calls and churn, *even when you are not their internet service provider.*

Get ahead of the inevitable trouble tickets and differentiate yourself.

Turnium enables you deliver reliable, secure, robust "on-ramp" connections to the cloud and the internet and ensure your customers have always-on connections to cloud services, including:

- **Email**
- **Desktop-as-a-Service**
- **Accounting, Finance, Payments, Banking**
- **Hosted PBX**
- **Inventory Management and Ordering**

- **Unified Communications**
- **Shipping and Receiving, Tracking**
- **Contact Center as a Service**
- **Web Chat, Customer Service**
- **Security, Monitoring, and more...**
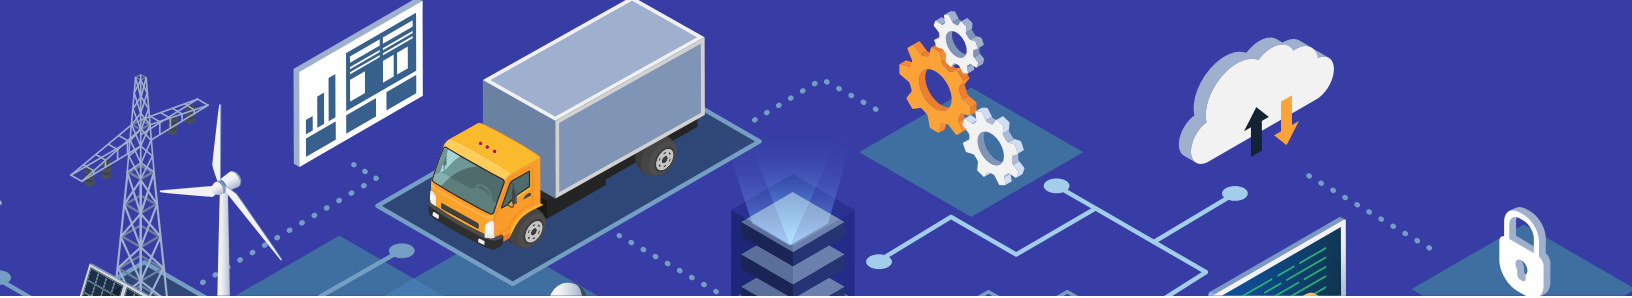

Failover and Multi-Carrier Bonding

Traditional business continuity solutions use primary and secondary circuits from different carriers in *active/active* or *active/standby* configuration. These are often expensive, dedicated leased circuits and cutting over the primary active circuit to the secondary backup circuit creates outages measured in minutes.

Turnium alows you to configure and deploy affordable, multi-carrier failover and business continuity services for your customers quickly. Use a combination of LTE, 5G, fixed wireless, low-earth orbit satellite, broadband, or fiber services from different providers. Bond multiple circuits together and deliver failover with active/active/active, active/active/failover, or active/failover configurations.

- The fastest failover — 300ms failover across aggregated circuits.

- IP address preservation so sessions don't fail.

- Private, secure multi-site connections for customers with cloud services or multiple locations.

- A solution that fits the business needs of single-site customers.

- Quality of Service over internet circuits to manage and prioritize data.

- Tunnel Bypass to send bulk data directly to the internet, not your infrastructure.

- Enable co-management and delegated administration for customers with the skills.

- Brandable interface to support your brand, your partners' brands, customer brand.

An Affordable and Practical Solution

Turnium gives Resellers (and our Hybrid OEM and OEM partners) a practical way to deliver secure, reliable, cloud on-ramps to customers. With Turnium, you'll be able to offer failover solutions that keep your customers online and differentiate your services.

Select from practical and affordable products and add your margin, or bundle them to deliver an integrated, cost-effective solution for your customers. Add value by bundling or selling additional circuits, SIM cards, and the hardware/CPE required.

	SD-Access	SD-Light	SD-WAN
Target Users	Single-site customers that need managed, redundant internet and failover to a standby circuit (e.g. LTE/5G).	Single-site customers that need managed bandwidth, more speed, multi-carrier bonded circuits. LTE/5G active or failover.	Multi-site customers that need to connect multiple locations, multiple clouds, or vehicles into a single network. Managed, aggregated bandwidth.

Join Turnium's partner program and benefit from:

1   **Cost Savings** – affordable failover, affordable software, affordable hardware.

2   **New MRR** – bundle with your cloud services at a per-seat-per-month cost and generate margin.

3   **Easy to Use** – simple GUI, automates programming, streamlines workflow, setup can be a clerical task.

4   **Easier Sales** – address and eliminate customer concerns about reliability.

5   **Multi-tenanted** – create a network of Sub-Resellers that buy from you and have their own private, secure space that you can manage. You can even give your larger multi-site customers their own space with delegated user permission to give them co-management and visibility.

6   **Option to Host** – start as a Reseller, migrate to hosting your own Core nodes, or host the whole solution and brand it with your name and control the complete customer experience.

About Turnium

Turnium Technology Group, Inc. delivers its software-defined wide area networking (SD-WAN) solution as a white label, containerized, disaggregated software platform that channel partners host, manage, brand, and price or as a managed cloud-native service provided by Turnium. Turnium offers a channel partner program designed for Telecommunications Service Providers, Internet and Managed Service Providers, System Integrators, and Value-Added Resellers.
