

Maximize your Customer Experience, Brand, Operations, and Service Provider Business

Turnium is the only full-featured platform that delivers best-in-class margins and control over customer experience for Service Providers.

Business Model

Enable SMB offers and price-points while driving increment revenue and profit.

SD-Access, SD-Light, and full SD-WAN offers. Fixed monthly cost per end-customer site.

Unlimited core node licenses. Deploy as many instances in as many data centers as you need.

Build your Brand

Improve how customers connect to your managed services. Increase customer experience of your brand.

Get a platform that you own and manage, giving you visibility and control of customer connectivity, end-to-end.

Bundle a managed on-ramp solution with your existing services and deliver a complete managed experience.

Performance

Deliver high performance, high reliability and secure connectivity to your hosted applications.

Proven, leading >90% link aggregation efficiency.

Deliver QoS over broadband, wireless, or 3rd party circuits to ensure the highest voice, video, and application experience.

Deliver on SLA and simplify support with always-on business continuity, circuit management and private, secure transport-agnostic connectivity for your customers.

Scalability and Management

Control costs, leverage existing infrastructure and drive down support costs.

Integrate with your existing security and UTM platforms, replace VPN, and secure data in transit.

Automate configuration, changes, or additional sites to reduce time-to-deploy and simplify your operations.

Deliver customer co-management by giving qualified customers access to their own management interface for visibility or limited control.

CONTACT TURNIUM TODAY. BUILT FOR SERVICE PROVIDERS.
